ABSTRACT

In 1971 Kentucky's 291 public high schools produced 39,004 graduates, or 70.1% of the 1967-68 ninth grade enrollment. From the 53 non-public high schools there were 3,966 graduates, or 78.5% of the 1,968 ninth graders. Forty-two percent of all graduates enrolled in colleges or universities. Compared to the class of 1960, the increase in number of graduates is 13,692 or 46.8%. Directly attributable to increased holding power are 4,399, or one of ten 1971 graduates. Of the 291 complete high schools, 24 (or 8.2%) had graduating classes of less than 30. Primary data sources are principals' annual reports, superintendents' end of year reports, and the "Biennial Report of the State Superintendent of Public Instruction". Part I of the document features tables showing the number and whereabouts of 1971 graduates of public and non-public high schools, separately and combined. A summary by counties of 1967-68 ninth grade enrollment, 1971 graduates, and total students reported enrolling in college is included. Part II compares trends in holding power by citing survival rates and graduate whereabouts for graduating classes in the ten year period from 1962-71. Size of graduating classes and the relationships of school size, ninth grade enrollment, and graduates entering college is given. Relative county standings are seen in tables showing holding power, graduates, and survival rate of ninth grade to college. (DS)

FOREWORD

I am pleased to make available to the schools of Kentucky and to the public in general the sixteenth annual report in a series starting in 1956 on holding power and whereabouts of graduates of Kentucky high schools. It is believed that the replication of this study, with minor additions to reflect changes in reporting practices will help to supply a key dimension for evaluation of educational outcomes--the ultimate measure of a good school.

The comparative analysis of the data relating to the class of 1971 in terms of the class of 1960, provides much tangible evidence of the continuing progress of secondary education in Kentucky. The growth has been significant and uninterrupted. The birth rate showing a sharp decline since its peak in 1947 has leveled off and currently shows a gradual upward movement. It is a tribute to local leadership that increased holding power has been the mainstay of high school growth during the period of declining births. It is anticipated that greatly-improved and expanded programs and services will continue to be reflected in the holding power of Kentucky schools. The accommodation of record elementary and secondary enrollments during the decade of the Sixties, under seemingly insurmountable odds in many school districts, is only a part of the true measure of gains in education under the State's Foundation Program.

It is hoped that this bulletin will be helpful to you in interpreting education's many facets of growth to date and its great expectations for the Seventies. A truly great period of development lies before us as Kentucky approaches a Bicentennial Anniversary in 1976. Your comments and suggestions for future releases of this bulletin series will be appreciated.

Lyman V. Ginger

Lyman V. Ginger
Superintendent of Public Instruction

ACKNOWLEDGMENTS

A generous amount of credit for this sixteenth report of a continuing series on holding power and whereabouts of graduates belongs to the high school principals of Kentucky and the several divisions in the Department of Education that collect, analyze, and report pupil data. Special recognition is due the divisions of Statistical Services and Computer Services for the continued development of an instant retrieval data system and the sharing of preliminary reports on high school data. The problems of Statistical Services in providing accurate and complete data on graduates were multiplied with the closing or merging of 113 public and 19 non-public high schools during the four-year period.

Special acknowledgments is also extended to the Bureau of Instruction; in particular, D. C. Anderson, director, Division of Elementary and Secondary Education and members of his staff for cooperation and assistance in working with school districts and private schools where pupil and graduate data were incomplete. Grateful appreciation is also expressed to the Bureau of Pupil Personnel Services, especially Lee Tyler, director and Lois Johnson, principal clerk in the Division of Pupil Personnel Attendance and Accounting. Reports from this division each year make possible the analysis, consolidation, and verification of much common pupil data submitted in separate reports and on different reporting schedules.

Finally special thanks go to Research office staff members--Don Mayfield, research intern, and Isabel Triplett and Elizabeth Perry who assumed major responsibility for verifying data, and organizing and typing the report.

INTRODUCTION

The sixteenth annual report in the series of bulletins on Holding Power and Graduates of Kentucky High Schools has the enlarged purpose of providing an overview of a decade of growth (1960-71) in addition to presenting the usual analysis of data for the graduating class of 1971.

In the 1956-57 school year, the full financing of the State's Foundation Program Law, enacted in 1954, marked the beginning of a new era in public education in Kentucky. While there are many dimensions of a comprehensive state-local-federal plan for providing full educational opportunity for children and youth, it is generally agreed that the ultimate criterion of adequacy of any plan is the quality and quantity of educational outcomes made possible through its operation. Using the first year of the decade of the Sixties as base-line data and the current year (1971), the following comparisons point up for selected measures the ten-year growth and expansion of the high school program in Kentucky.

The increase in the number of all high school graduates for the Class of 1971 as compared to the Class of 1960 is 13,692 or 46.8 per cent.

The increase in births in the corresponding years 1953 and 1954 (Class of 1971) as compared to 1942 and 1943 (Class of 1960) was 15,603 or 11.9 per cent.

The percentage of all graduates in 1960 in terms of total ninth grade enrollment four years earlier was 62.8 per cent. Comparable holding power for the Class of 1971 is 70.0 per cent.

The increase of graduates in the Class of 1971 over the Class of 1960 directly attributable to increased holding power, is 4,399 or approximately one of ten graduates in the class of 1971.

The number of complete public high schools with graduating classes was decreased from 396 in 1960 to 291 in 1971--a decrease of 105 schools or 26.5 per cent.

The number of complete public high schools, having a graduating class of 100 or more increased from 64 public schools, or 16.3 per cent in 1960, to 140 high schools, or 48.1 per cent in 1971. (See Charts 8 and 9).

The number of complete public high schools in 1960 with graduating classes less than 30 in size was 112 or 28.5 per cent of total schools; in 1971, there were 24 schools, or 8.2 per cent of total schools in this category (Charts 8 and 9).

In 1960, the 64 high schools with graduating classes of 100 or more enrolled 43.9 per cent of total ninth grade enrolment four years earlier, produced 43.6 per cent of total graduates, and reported 49.6 per cent enrolling in college in the fall term following graduation. (See Chart 8).

In 1971, the 140 public high schools with graduating classes of 100 or more enrolled 76.5 per cent of total ninth grade four years earlier, produced 78.1 per cent of all graduates, and reported 80.4 per cent of total graduates enrolling in college in the Fall of 1971.

A comparison of survival ratios in all Kentucky high schools for 1960 and 1971 reveals the following grade level changes:

	Kentucky Survival Ratios Per 1,000		
Grade	1960	1971	Change
Nine	1,000	1,000	--
Ten	867	914	+ 47
Eleven	753	815	+ 62
Twelve	657	729	+ 72
Graduates	628	700	+ 72

Generally comparable national retention rates[1] for 1960 and 1969 are as follows:

	Survival Ratios Per 1,000		
Grade	1960	1969	Change
Nine	1,000	1,000	--
Ten	924	970	+ 42
Eleven	825	899	+ 74
Twelve	738	831	+ 93
Graduates	687	790	+ 103

1. Derived data. Source: Digest of Educational Statistics, 1970 Edition. U. S. Office of Education, p. 9.

A comparison of Whereabouts of Graduates of all Kentucky high schools, 1960 and 1971, reveals the following changes in an eleven-year span in the standard categories for which principals provide data:[1]

	1960	1970	Change	% Change
College or University	10,759	18,350	+7,591	+70.6
Trade, Technical, Nursing School	1,382	3,439	+1,172	+51.7
Business School	885			
Sales or Office	3,928			
Farming	1,321	10,956	+3,243	+42.0
Factory or Trade	2,464			
Other Employment Including Military	2,414	1,231	-1,183	-49.0
Not Employed or at Home	4,409	3,051	-1,358	-30.8
Unknown	1,716	3,292	+1,576	+91.8
Other	--	2,651	+2,651	--
Total	29,278	42,970	+13,692	+46.8

In the Fall of 1960, 13,026 or 44.5 per cent of June graduates were reported entering a formal program of education beyond the high school. Eleven years later, principals reported 21,789 or 50.7 per cent of the 1971 graduates enrolled in a post-secondary program--college or university, trade, technical, nursing school or business school. A graphic portrayal of the growth pattern is shown on the following facing pages.

1. Revision of Principals' Annual Report in 1966 resulted in changes in categories reported on by principals which limit the comparability of items to broad approximations except for "college or university."

Source and Interpretation of Data

There are two primary sources of data on public high school graduates: the principal's annual report and the superintendent's end-of-year report. Statistical data on number of graduates in the principal's report in October may vary from end-of-year enrollment data in the statistical report of the superintendent submitted at the close of the school year on June 30. The data for graduates of public school districts are published in the Biennial Report of the State Superintendent of Public Instruction. The latter report includes graduates of public school districts only whereas this report accounts for all graduates of public and non-public high schools in the state.

A further precaution is necessary in distinguishing between "holding power" as defined in this report and school dropouts. The method of determining retention rates follows the national pattern. In this bulletin series, rates for the ninth grade through high school graduation are based on enrollments in successive grades in successive years of all public and non-public schools. The data at hand limit the base year to the ninth grade.

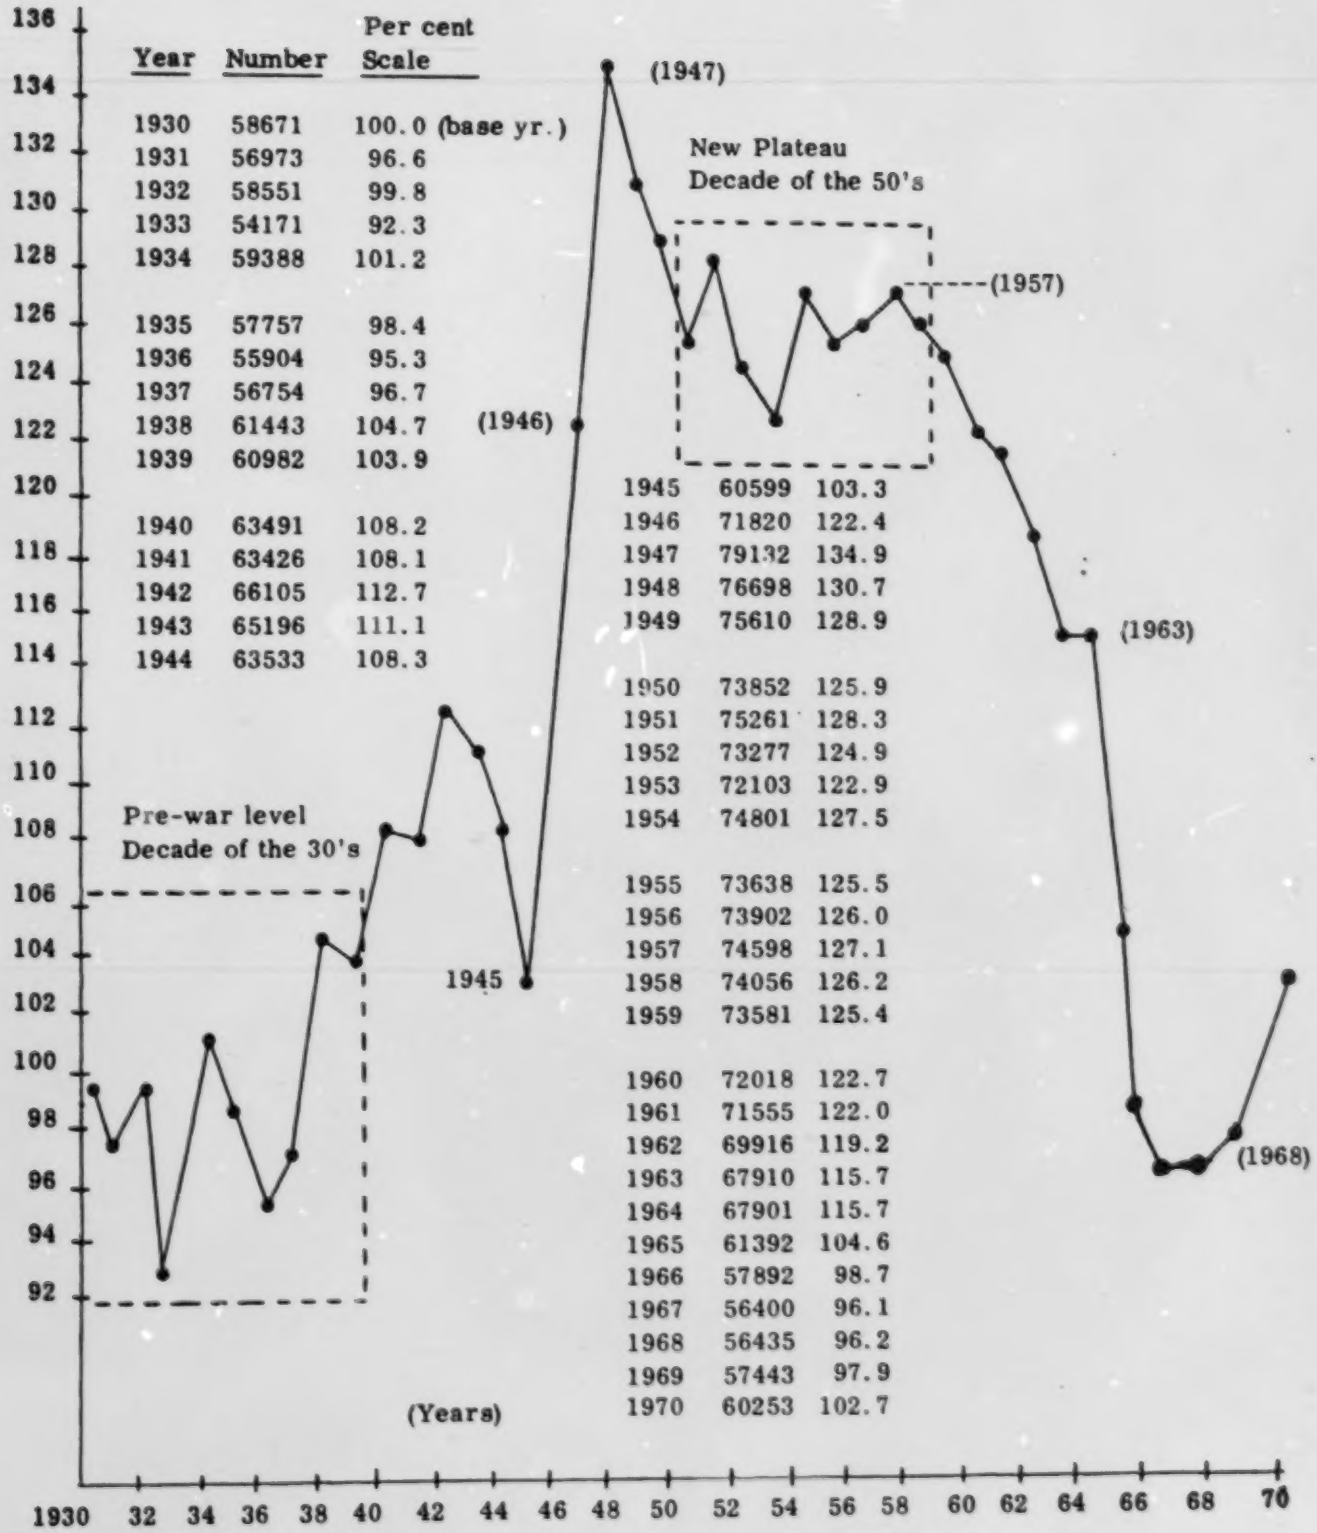
Reporting the Data

Charts 1 and 2 on facing pages portray the rapid growth of secondary education in the Sixties. The Highlights section provides a brief summary of tabular data and comparisons with state and national norms.

Part I presents current data on holding power and graduates of public and non-public schools in Tables 1 thru 5.

Trends and related data are shown in Part II. A special section of Part II deals with a comparison of the relationships of the number and size of public school graduating classes in 1959-60 with the current year, 1970-71. A comparable summary is provided for non-public high schools.

Chart 3. Kentucky Births, 1930-70



Year	Number	Per cent Scale

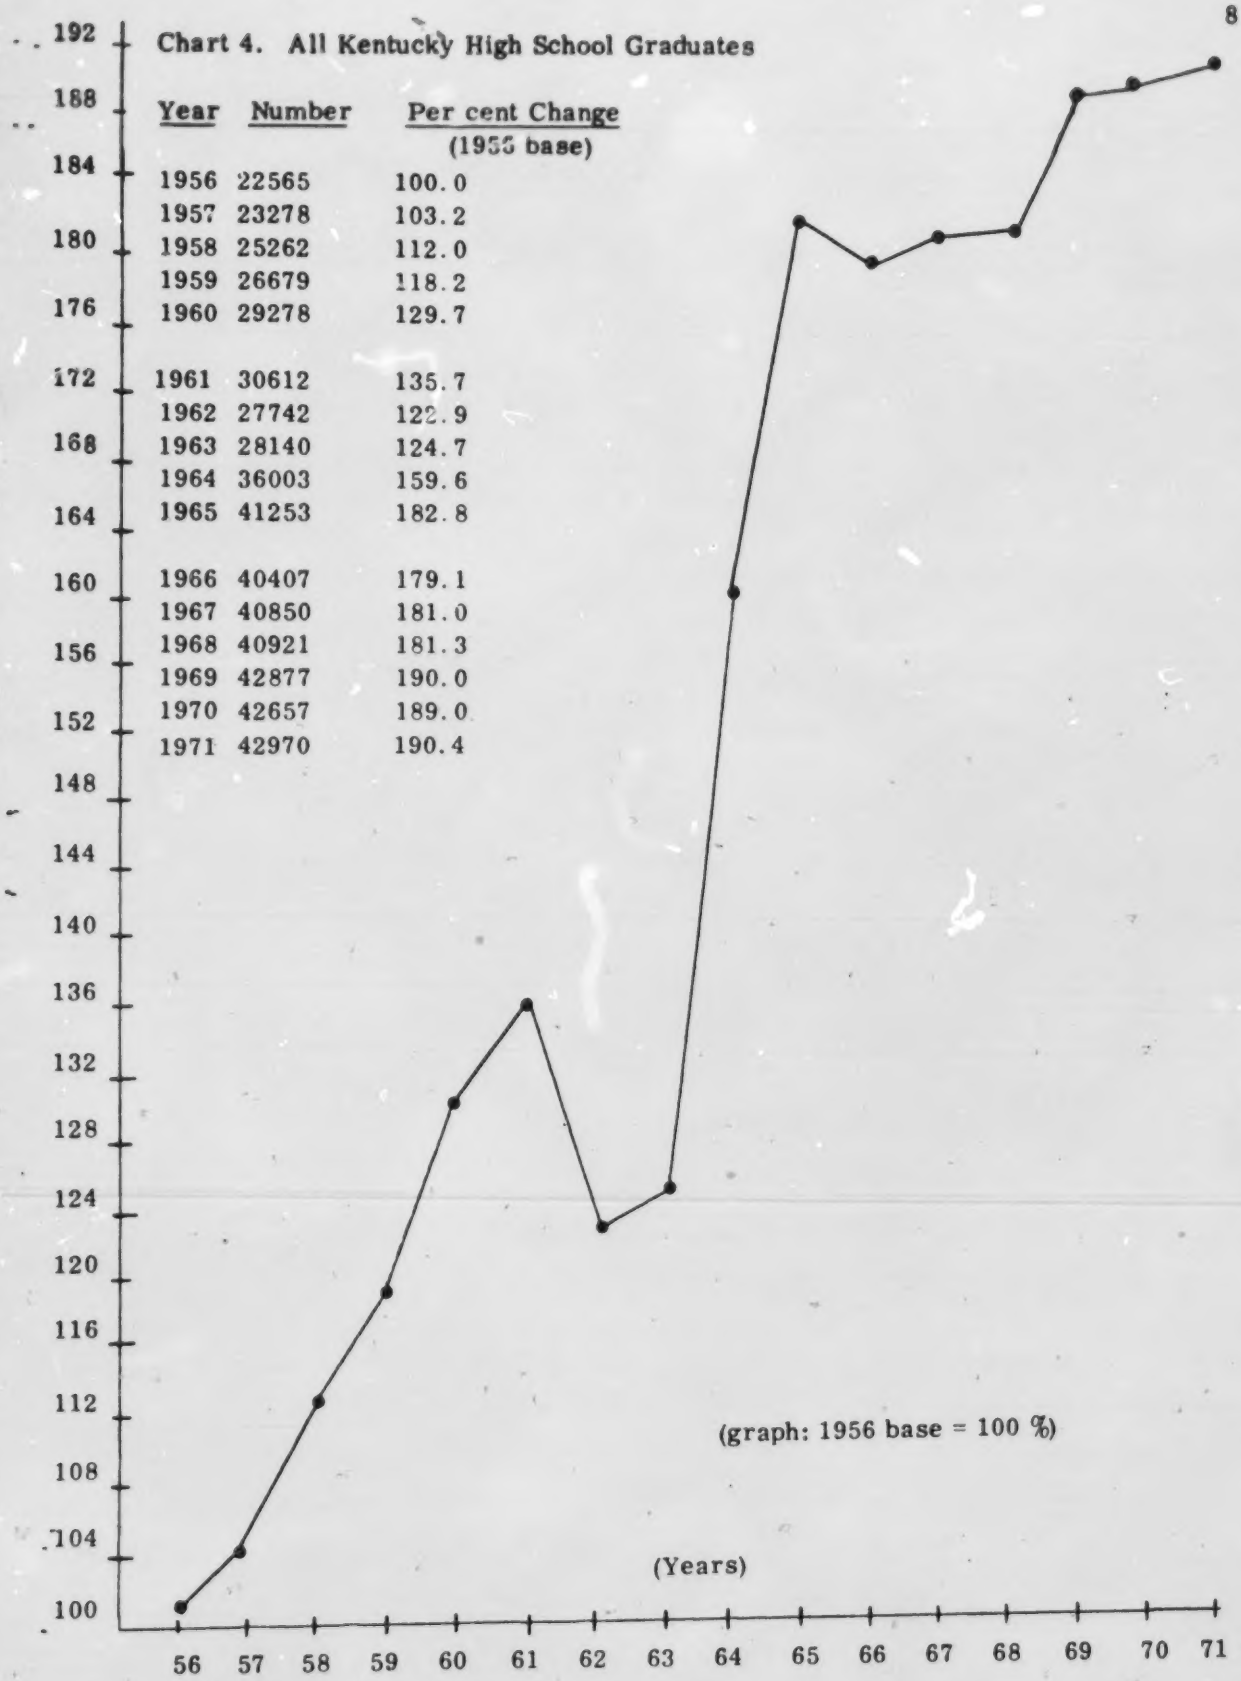
1970	42657	189.0
1971	42970	190.4



HIGHLIGHTS

In 1970-71, from the 291 complete public high schools (including six Regional and Federal high schools, there were 39,004 graduates, or 70.1 per cent of the total number of 56,123 ninth grade enrollment in 1967-68. Of the total graduates, 19,278 or 49.4 per cent were boys and 19,726 or 50.6 per cent were girls.

From the 53 non-public high schools, there were 3,966 graduates or 78.5 per cent of the total number of 5,051 ninth grade enrollment in 1967-68. Of the total graduates, 2,010 or 50.7 per cent were boys and 1,956 or 49.3 per cent were girls.

From the total public and non-public high schools, there were 42,970 graduates, or 70.0 per cent of the total number of ninth grade pupils enrolled in 1967-68. Of the total graduates, 21,288 or 49.5 per cent were boys and 21,682 or 50.5 per cent were girls.

Of the graduates of public high schools, there were 16,025 or 41.1 per cent reported as enrolling in college or university. Of this number 8,135 or 50.8 per cent were boys and 7,890 or 49.2 per cent were girls.

There were 2,325 graduates, or 58.6 per cent of the total graduates of non-public high schools, reported enrolling in college or university. Of this number, 1,330 or 57.2 per cent were boys and 995 or 42.8 per cent were girls.

From all high schools, there were 18,350 graduates, or 42.7 per cent of the total number of 42,970 graduates, reported enrolling in college or university, Fall 1971.

Reported enrolling in some type of formal education program beyond the high school including trade or special school were: public school graduates, 19,202 or 49.2 per cent of total public graduates; non-public high schools, 1,587 or 40.0 per cent; and for all high schools; 21,789 or 50.7 per cent of total graduates.

The average survival rate per 1,000 ninth grade enrollment (1967-68) for all high schools was: tenth grade, 914, eleventh grade, 815; twelfth grade, 729; and graduates 700.

Seventy (70.0) per cent of the total ninth grade enrollment four years earlier completed high school in 1970-71. The approximate national average is 79 per cent.

For all Kentucky high schools, 42.7 per cent of all graduates in June, 1971 were reported enrolling in college or university in the Fall of 1971. The approximate national average is 59.7 per cent.

For all Kentucky high schools, 299 per 1,000 ninth grade pupils completed high school and enrolled in college or university. The approximate national average is 472 per 1,000.

Age of Public High School Graduates

Wide variability in age of public high school graduates in 1960 and earlier years as compared to 1971 has been reduced as shown by the lower and upper extremes of the age distribution for 1960 and 1971. (See Tables 14 and 15).

In 1960, 84.1 per cent of the 24,911 graduates were at ages 17 and 18. Of this number, 46.5 per cent of girls and 39.7 per cent of boys were graduated at age 17. Graduating at age 16 or under were 366 boys (3.1%) and 588 girls (4.5%).

In 1971, ages 17 and 18 were more heavily favored as the percentages for boys and girls at these ages climbed to 88.6 per cent -- 41.8%, age 17: and 46.8%, age 18. The number of graduates at age 16 or under was significantly reduced to 89 boys (0.5%) and 156 girls (0.8%) as compared to 1960.

In 1960, 84.7 per cent of boys and 90.9 per cent of girls had completed high school by age 18. In 1971, these percentages had increased to 85.9 per cent for boys and 92.6 per cent for girls.

What about the holding power of Kentucky high schools for boys and girls graduating beyond age 18?

In 1960, 1836 boys, or 15.3 per cent of total graduates, continued in school beyond age 18 to graduate. Comparable statistics reveal that 1177 girls, or 9.0 per cent of total, remained in school beyond age 18 to graduate.

With higher rates of graduation at 18 and below, comparative data on graduation experience beyond age 18 reveal an increase in numbers but lower percentages as follows:

1) Boys -- 2666 of 18,856 graduates, 14.1%.
2) Girls -- 1446 of 19,464 graduates, 7.4%.

Summary Graduation Experience Beyond Age 18

	Boys				Girls			
	1960		1971		1960		1971	
Age	No.	%	No.	%	No.	%	No.	%

21	122	1.0	81	0.4	70	0.5	46	0.2
	1836	15.3	2666	14.1	1177	9.0	1446	7.4

Changing Senior Class Size

In 1959-60, Kentucky public school districts operated 393 complete high schools with 112 schools, or 28.5 per cent, having graduating classes with less than 30 graduates, and 64 schools, or 16.3 per cent, having graduating classes of 100 or more members (Chart 8).

The 112 smaller schools produced 2,190 graduates or 8.5 per cent of all public high school graduates in 1960, the 64 larger schools accounted for 11,215 or 43.6 per cent of total graduates.

The smaller schools (112) had a holding power of 59.6 per cent, and reported 25.9 per cent of graduates enrolling in college; the larger schools (64) had a holding power of 61.4 per cent, and reported 40.0 per cent of graduates enrolling in college.

The average size of graduating classes for the 112 small schools was 19.6, the range from 3 to 29; the average size of graduating classes for the 64 large high schools was 175; the range 100 to 507.

In 1970-71, there were 291 complete public high schools with 24 schools, or 8.2 per cent having graduating classes with less than 30; and 140 schools, or 48.1 per cent, with graduating classes of 100 or more members (Chart 9).

The 28 small schools produced 545 graduates or 1.4 per cent of total graduates; the 140 large schools, 30,202 graduates or 78.1 per cent of all graduates.

In ten years, the schools of less than 30 graduates showed an increase in holding power from 59.6 to 60.1 per cent, and reported 199 or 36.5 per cent of their graduates enrolling in college as compared to 25.9 per cent in 1960.

The 139 large schools having 100 or more graduates showed an increase in holding power from 61.4 to 71.6 per cent, and reported 12,796 or 42.4 per cent of their graduates enrolling in college as compared to 40.0 per cent in 1960 (Charts 8 and 9).

In 1971, the average size of graduating class for the 24 schools with graduating classes of 29 or less was 22.7; the range from 15 to 29; the average size class for 139 large schools was 216, the range from 100 to 586.

In 1971, there were 53 non-public high schools with 19, or 35.8 per cent, having graduating classes of less than 30, and 16 or 30.2 per cent having graduating classes of 100 or more (Chart 10).

The 19 small schools accounted for 315 graduates, or 7.9 per cent of all graduates; the 16 large high schools produced 2,612 graduates, or 65.8 per cent of all non-public graduates (Chart 10).

PART I

HOLDING POWER AND GRADUATES

The three basic tables in Part I provide a summary of the number and whereabouts of graduates of all Kentucky public and non-public high schools, separately and combined, for the school year 1970-71.

The 61,418 ninth grade public and non-public high school students in 1967-68 were enrolled in 382 complete high schools, 48 junior highs, and 8 high schools. Of this total number of ninth grade students, 42,970 or 70.0 per cent were graduated from 348 complete high schools in 1971. The distribution of all Kentucky high schools in 1968 and 1971 by type of organization and control are shown in the following summary:

Type of Organization	Type of Control									
	County District		Independent District		Private and Parochial		State, Fed. & Regional		Total	
	70-71	67-68	70-71	67-68	70-71	67-68	70-71	67-68	70-71	67-68
Grades 9-12	142	151	28	35	43	60	2	2	215	248
Grades 7-12	50	64	30	32	5	4	3	6	88	106
Grades 10-12	20	15	9	4	0	0	1	0	30	19
Grades 8-12	7	6	5	1	3	2	0	0	15	9
Total	219	236	72	72	51	66	6	8	348	382
Jr. Highs	36	26	2	21	1	1	1	0	40	48

Source of data: State Bulletin Series, Kentucky High Schools, Vol. XXXVI (July, 1968), and Vol. XXXIX (July, 1971), Kentucky Department of Education.

Table 1 presents data by districts on 39,004 public school graduates of 291 high schools in county and independent districts and 6 special high schools. Table 2 presents above school district data by counties.

Table 3 shows similar combined data by counties for 3,966 graduates of 52 non-public high schools.

Table 4 provides a summary by counties of all ninth grade enrollment (1967-68), all high school graduates, 1971, and total students enrolling in college or university in the Fall of 1971. A new feature of Table 4 is the numerical index of ninth grade pupils by counties which is a product of per cent completing high school times per cent graduates entering college. The approximate national average for this index is 472 per 1,000 ninth grade pupils enrolling in college four years later. The Kentucky average survival rate for ninth grade pupils to college is 300 per 1,000.

A concluding summary page combining data for Tables II and III shows percentage distribution by sex and type of school for all graduates.

PART II

TRENDS: HOLDING POWER AND RELATED DATA

The brief trends data on holding power and graduates in this section, even of short duration, provide useful benchmarks for appraising extent and rate of change in holding power in Kentucky. Though limited to a measure of quantity only, these data provide important indices to aid in program evaluation and as a base for further study.

Indication of Holding Power

As a general measure of holding power the tables and charts in this section provide a summary of the ten graduating classes since 1961 for four years after the full-financing of the Minimum Foundation Program in 1956-57. The majority of graduates of 1971 were enrolled in the first grade in the school year 1959-60--fourth year of F.P. Law.

Table 5 presents state-wide data for public school districts on survival rates and whereabouts of graduates of public high schools for ten graduating classes, 1962-1971 inclusive.

Corresponding data for non-public high schools are presented in Table 6.

Table 7 shows the combined data for all high schools and provides, in a limited way, a measure of the growth of the total secondary program (grades 9-12) in Kentucky.

Size of Graduating Classes

A new set of data on size of graduating classes of public high schools is continued in this report. The first analysis of relationships of size of school, ninth grade enrollment, number of graduates, and graduates reported entering college was reported in 1961 for the class of 1960.[1] These data for public high schools are reproduced in Table 8 with graphic portrayal of the data shown in Chart 8.

---

1. Department of Education. Graduates Kentucky High Schools, 1960. (Frankfort, Ky.: State Department of Education). Educational Bulletin, Vol. XXIX, No. 5, 1961.

The 1960 report is used as baseline data for measuring change on the same variables for the Class of 1971 (see Table 9). Graphic portrayal of the data is provided in Chart 9. Comparable data for non-public schools are shown in Table 10 and Chart 10.

Focus on the size of graduating classes as an indicator of the degree of breadth of program that might be expected in an average comprehensive high school was emphasized by Conant in his initial study of The American High School Today.[2] One characteristic of a modern comprehensive high school advanced in the first Conant report of 1959 is that it should have a minimum of one hundred students in the graduating class in order to provide, at a reasonable cost, a basic program of education for all youth in its general attendance area.

Estimated data on Kentucky public high schools for 1957-58 as reported by Conant, final data for 1957-58 updating this report, and current data for the Class of 1971 are shown below.

Year	Total No. 12th-Grade Students	12th Grade Students in Schools with 12th-Grade Enrollment of Less than 100		Total No. Schools Offering Diplomas	Schools Offering Diplomas with 12th-Grade Enrollment of Less than 100	
		Number	Per cent		Number	Per cent
1957-58[1]	22,860	14,835	65	423	386	91
1957-58[2]	23,551	15,187	65	413	365	88
1966-67	37,651	10,387	28	320	186	58
1970-71[3]	40,375	8,102	20	291	143	49

1. Estimate used in Conant report
2. Final Data. Source: Kentucky Department of Education
3. Does not include State and Federal Schools

2 James B. Conant. The American High School Today (New York: McGraw-Hill Book Co., 1959) p. 132.

From the above data, it will be observed that a dramatic reversal has taken place in the number of graduates from small and large high schools in a relatively short span of time. Mergers and consolidations have enabled local school districts to reduce the number of schools offering diplomas from schools (Conant report) in 1957-58 to 291 schools in 1970-71--a reduction of 132 schools or 31.2 per cent. The number of high schools offering diplomas with 12th-grade enrollment less than 100 was reduced from 386 to 143--a reduction of 243 schools or 63.0 per cent--reflecting a combination of increasing enrollment and consolidation of schools since 1958.

The data on relationships of size of school, ninth grade enrollment, and graduates to college for the non-public school classes of 1971 are shown in Table 10 and graphically portrayed by four broad graduation size groups in Chart 10.

County-Wide Summary Data

By way of a final summary, the three measures used throughout the report--holding power, graduates, and survival rate of ninth grade to college--for public and non-public schools are consolidated into two tables showing relative standings of counties as geographic units in a "standard nine" distribution. Holding power as measured by total graduates per 1,000 ninth grade enrollment in all schools four years earlier is distributed by counties in Table 11 and graduates to college, Table 12.
